Good Manufacturing Practice for

Medicinal Products for Human and Veterinary Use

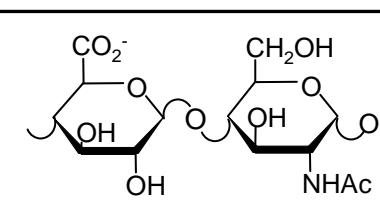

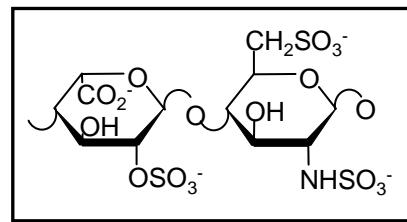

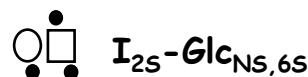

Annex 2

**Manufacture of Biological active substances and Medicinal Products for Human
Use**

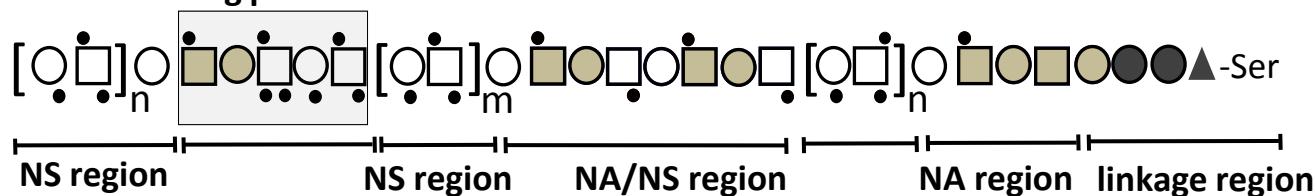

| Type and source of material | Example product | Application of this guide to manufacturing steps shown in grey | | | |
|-------------------------------------------|------------------------------------------------------------------------|-----------------------------------------------------------------------|----------------------------------------------|----------------------------|----------------------|
| 1.Animal or plant sources: non-transgenic | Heparins,insulins, enzymes,proteins,allergen extract, ATMPs immunosera | Collection of plant, organ, tissues or fluid | Cutting, mixing, and / or initial processing | Isolation and purification | Formulation, filling |

- Che cosa è l'EPARINA
- polisaccaride solfatato
- Unità disaccaridiche
- Acido iduronico 2-solfato e 6-O-solfato
- Glucosamina N-solfato

Heparin structure

AT-binding pentasaccharide

N-sulfated-3,6-O-sulfated glucosamine

galactose

xylose

2-O-sulfated Iduronic acid

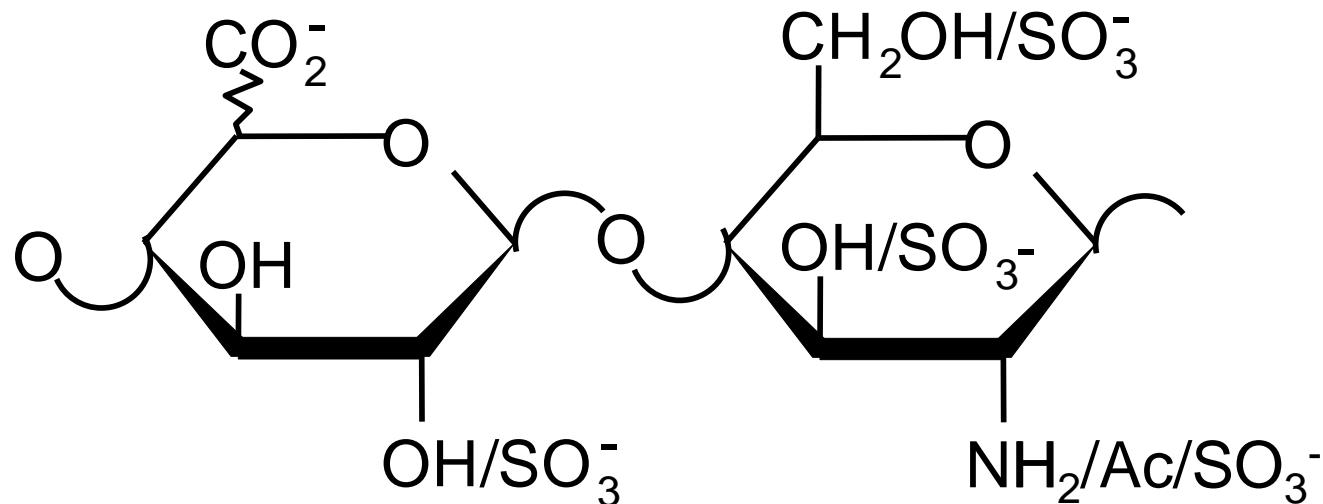

glucuronic acid

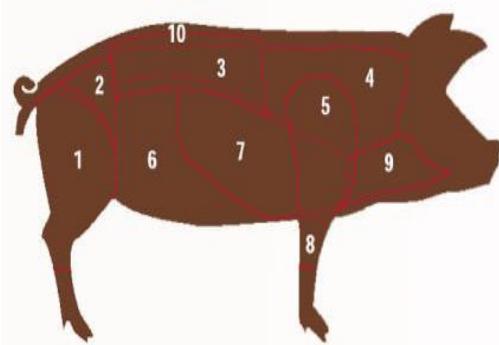

N-acetyl-glucosamine

Heparin structural complexity

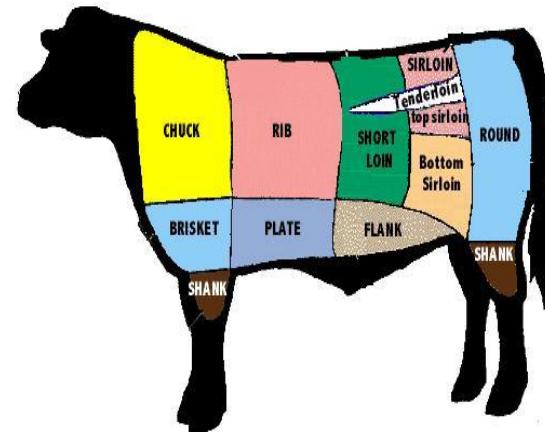

| | | | |
|---------------------|---|------------|----|
| N° building blocks: | { | DNA | 4 |
| | | Protein | 20 |
| | | Heparin/HS | 48 |

Heparin production

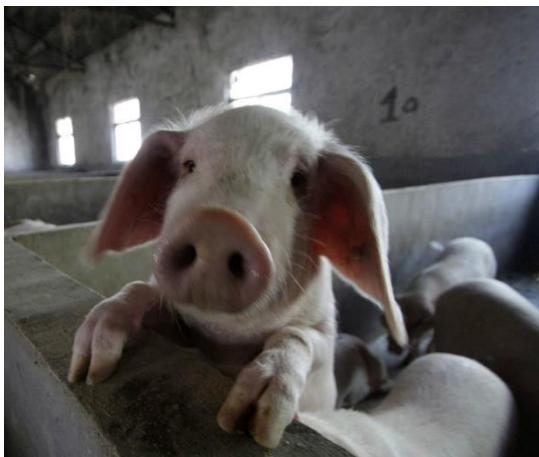

Pig intestinal mucosa

Beef intestinal mucosa and/or lung

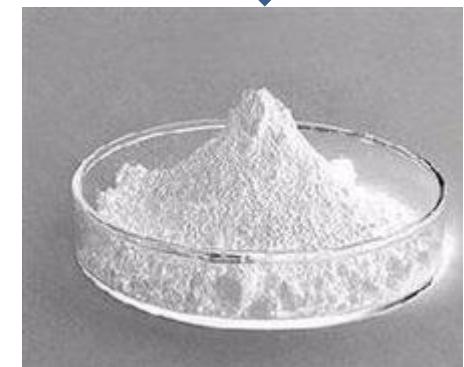

Heparin production

Crude heparin

Drug

API heparin

Quali sono le impurezze ?

- **Impurezze o contaminanti naturali**
- **Impurezze legate alle fasi di lavorazione nel processo di produzione**
- **Impurezze dovute a modifiche strutturali**

Heparin structural characterization

Analysis of depolymerized material

HPLC / CE of disaccharides mixture obtained by enzymatic digestion

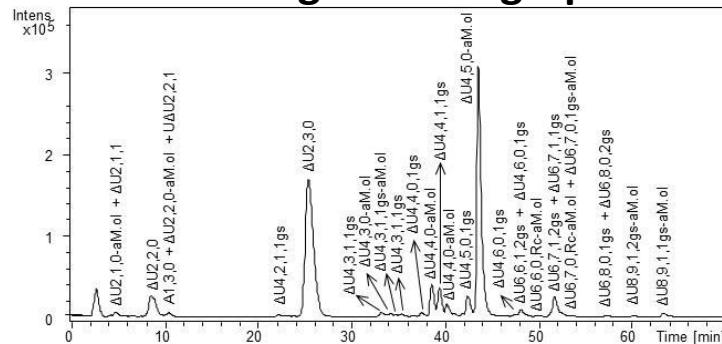

HPLC of disaccharides mixture obtained by nitrous acid depolymerization.

UPLC/ESI-IT-MS of partially or totally depolymerized material

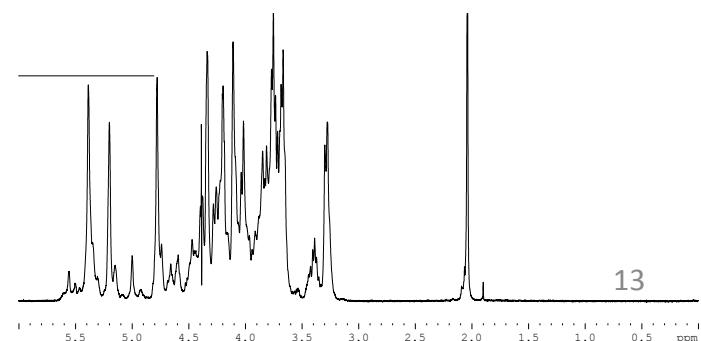

Analysis of intact material

NMR spectroscopy

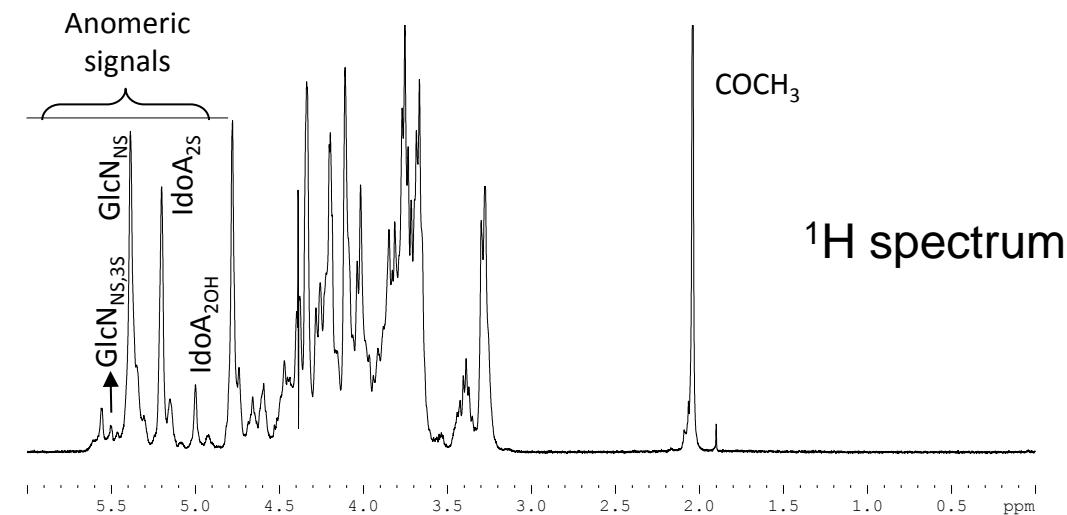

Building block fingerprint

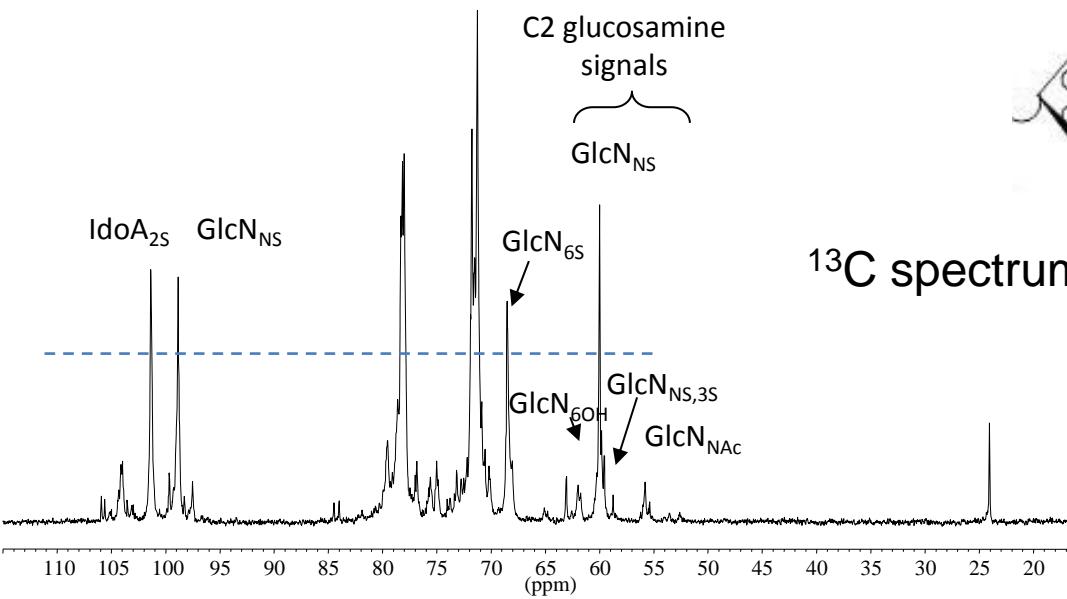

Product fingerprint

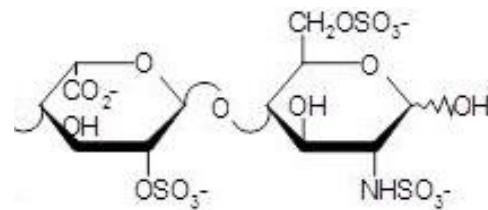

Heparin structure

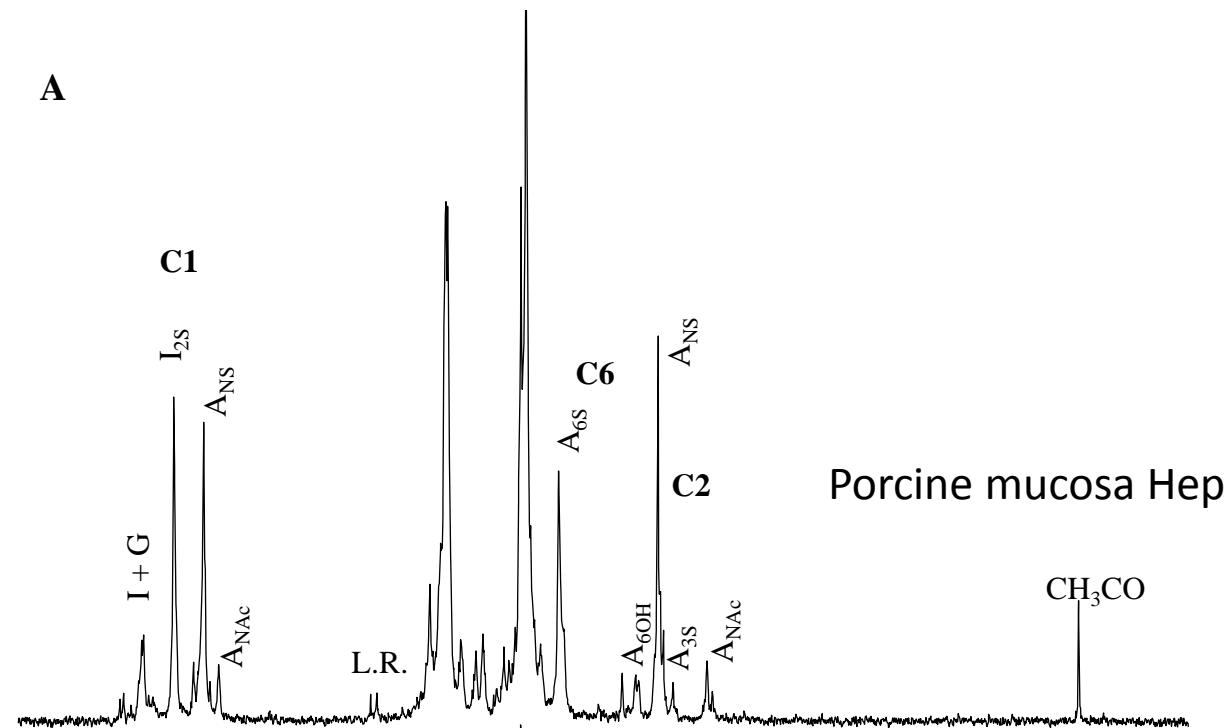

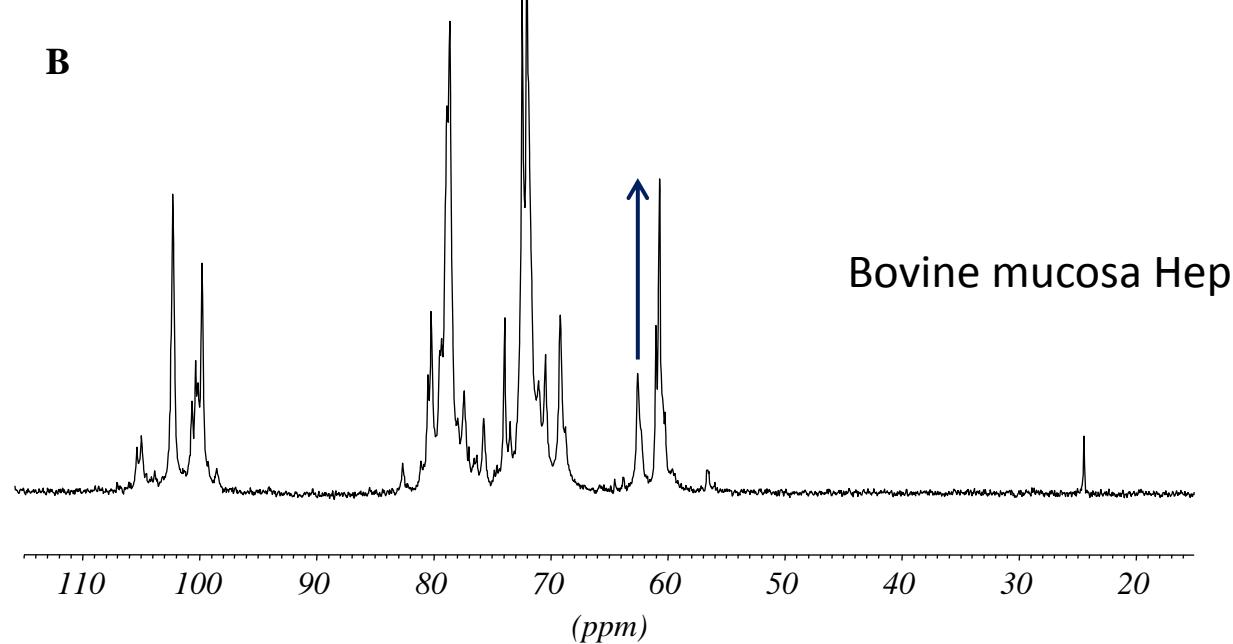

^1H spectrum

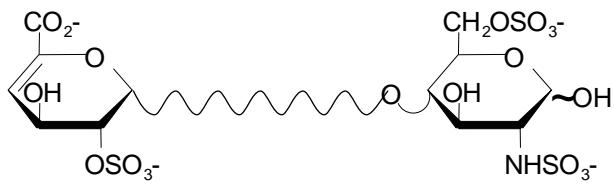

^{13}C spectrum

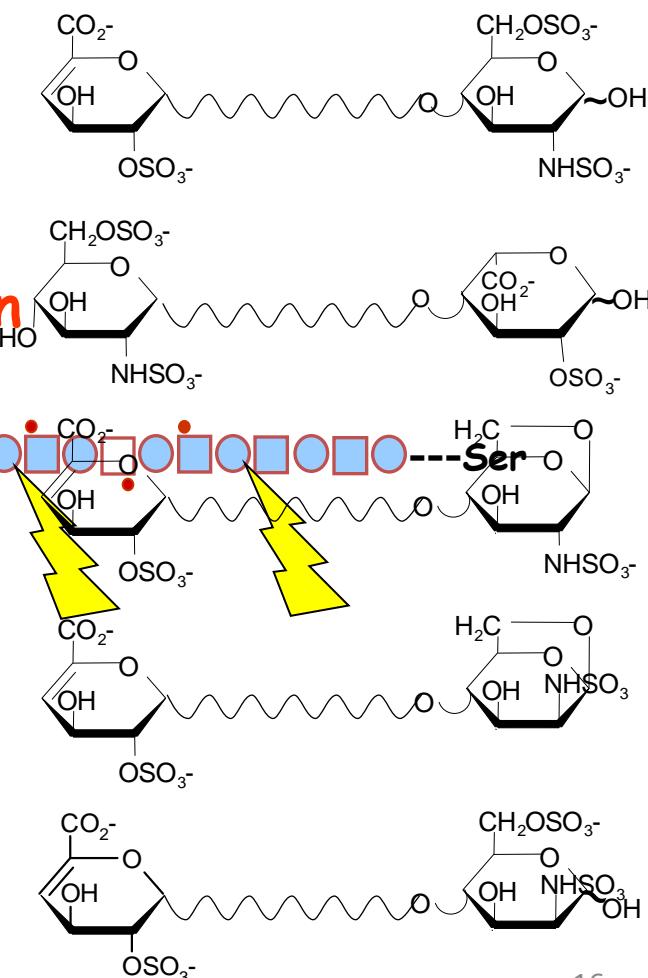

A**B**

Low Molecular Weight Heparins

β -eliminative cleavage by heparinase
(Tinzaparin)

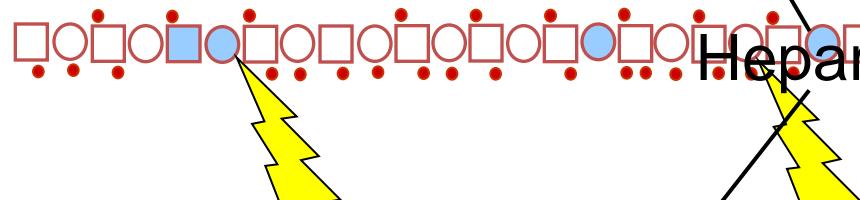

β -eliminative cleavage of the
benzyl ester by alkaline treatment
(Enoxaparin)

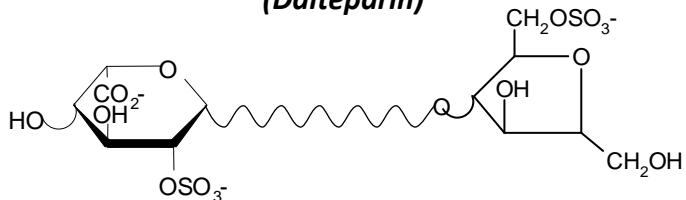

unfractionated heparin
(UFH)

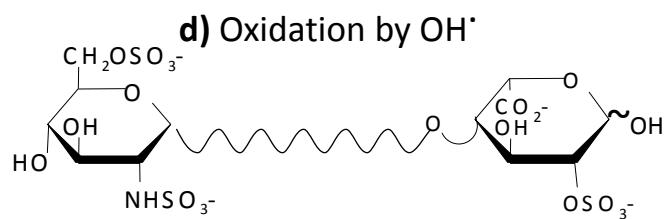

Heparin

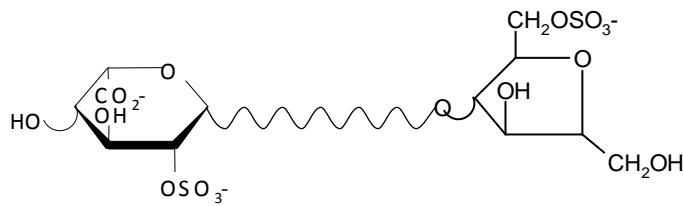

Deaminative cleavage with nitrous acid
(Dalteparin)

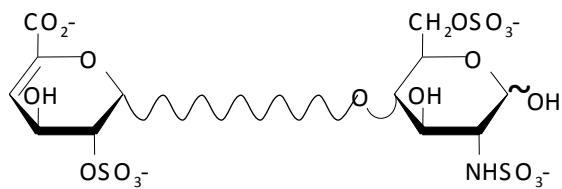

NMR characterization of GAGs

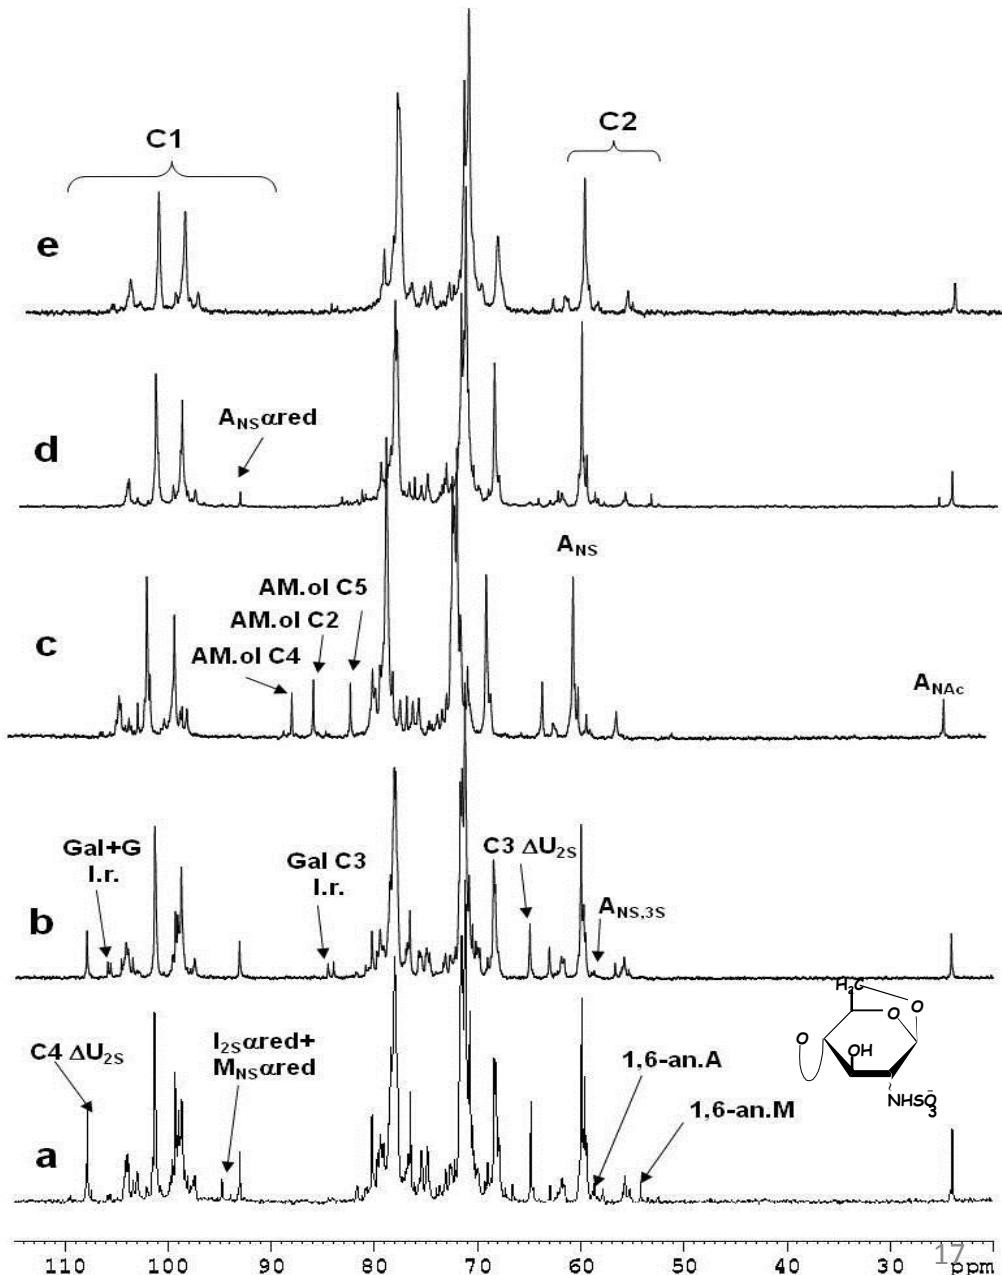

c) Deaminative cleavage with nitrous acid

β -eliminative cleavage by: **a)** chemical;
b) heparinase

Heparin

“Impurezze” o Contaminazioni

- **BSE (Bovine Spongiform Encephalopathy) e TSE (Transmitting Spongiform Encephalopathy)**
- **Contaminazione dell'eparina con condroitin supersolfatato**

Note for guidance on minimising the risk of transmitting animal spongiform encephalopathy agents via human and veterinary medicinal products (EMA/410/01 rev.3)

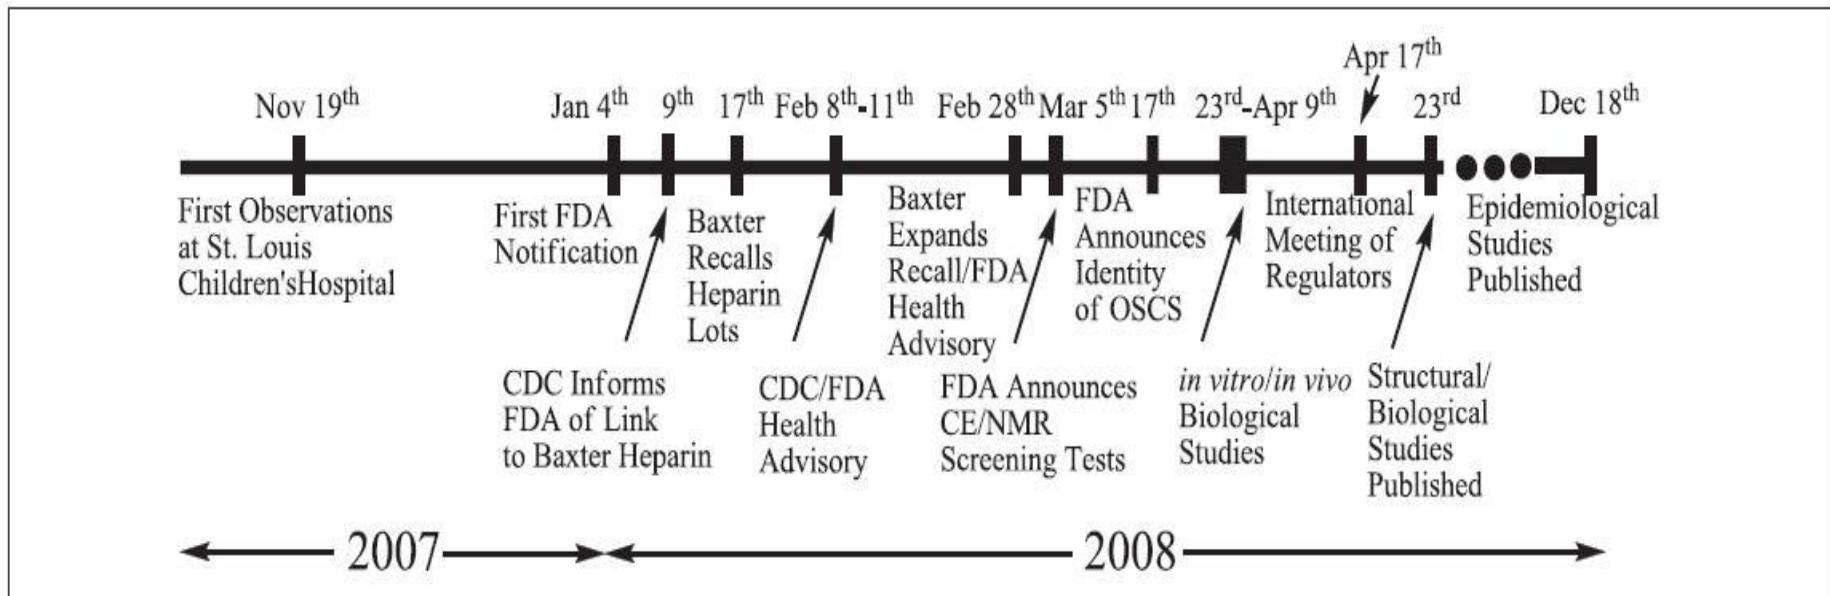

**VIRUS VALIDATION STUDIES:
THE DESIGN, CONTRIBUTION AND INTERPRETATION
OF STUDIES**

**VALIDATING THE INACTIVATION AND REMOVAL OF
VIRUSES**

Note for Guidance

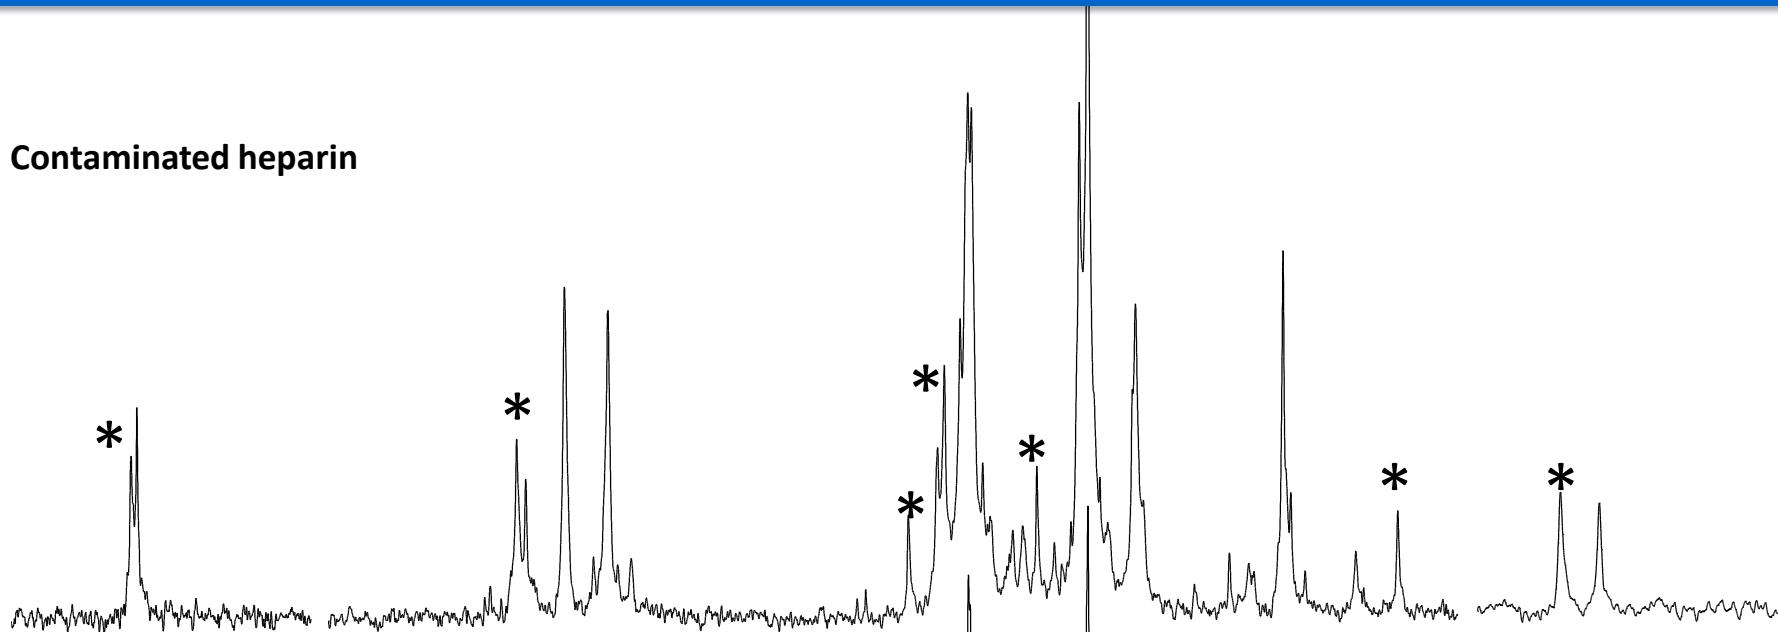

Contaminazione

Guerrini M, Beccati, D., Shriver, Z. et al. *Nat. Biotech.* 2008, 26, 669-675

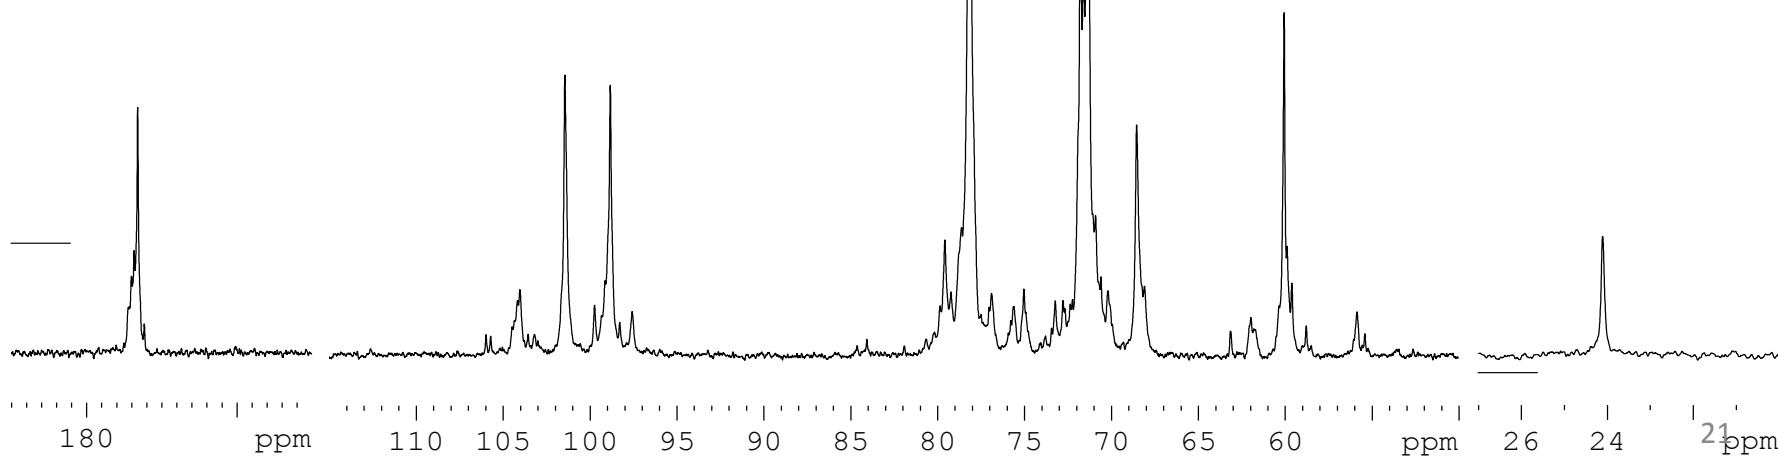

The contaminated Heparin story

Contaminated heparin

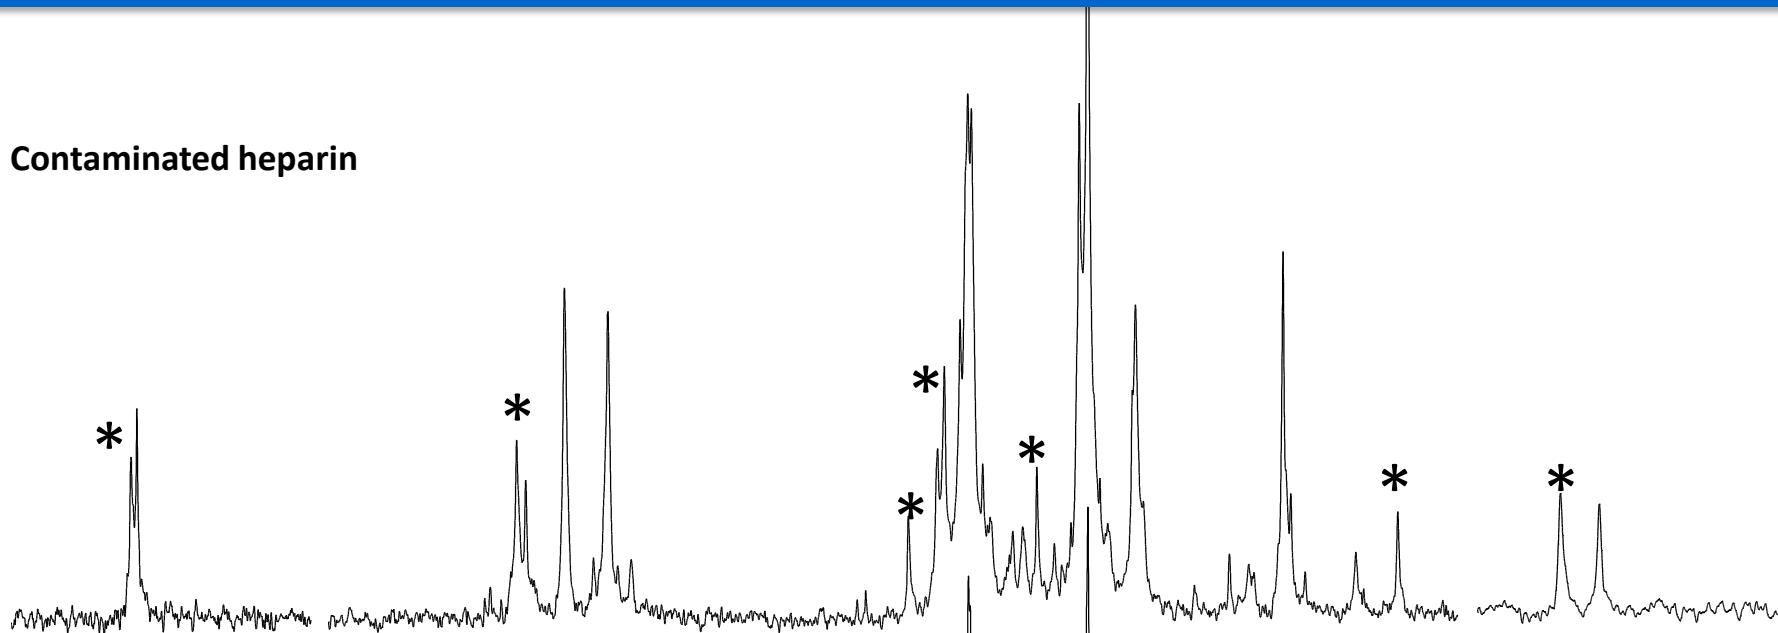

Standard Heparin

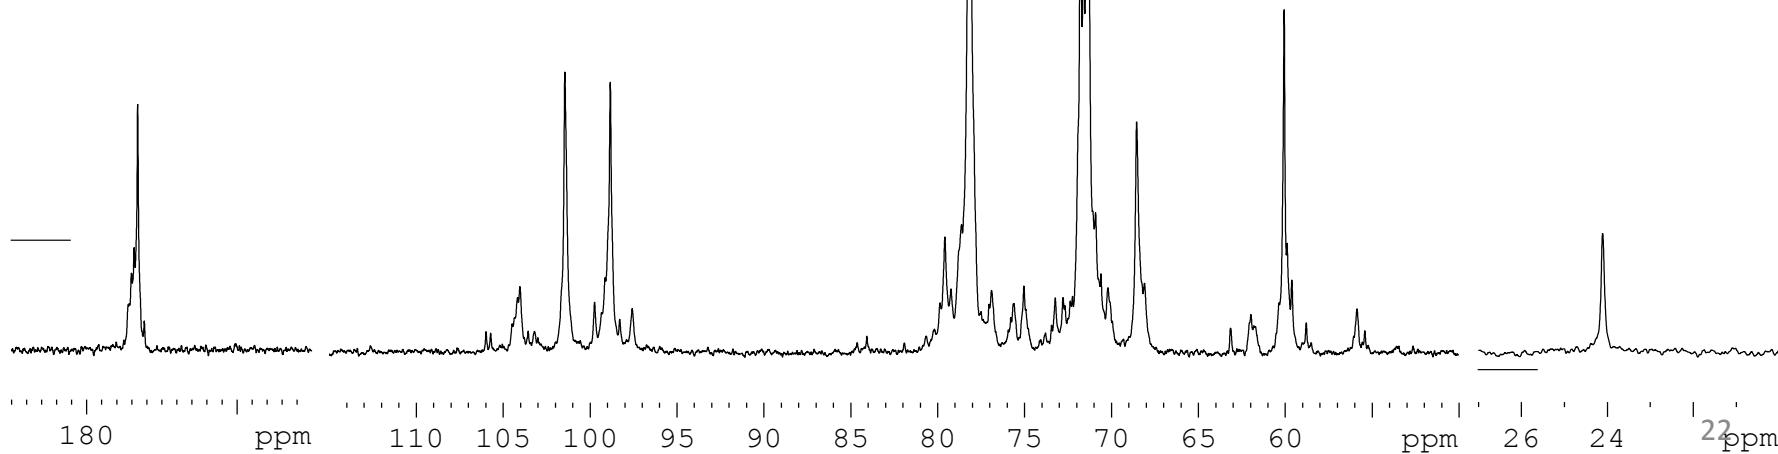

The contaminated Heparin story

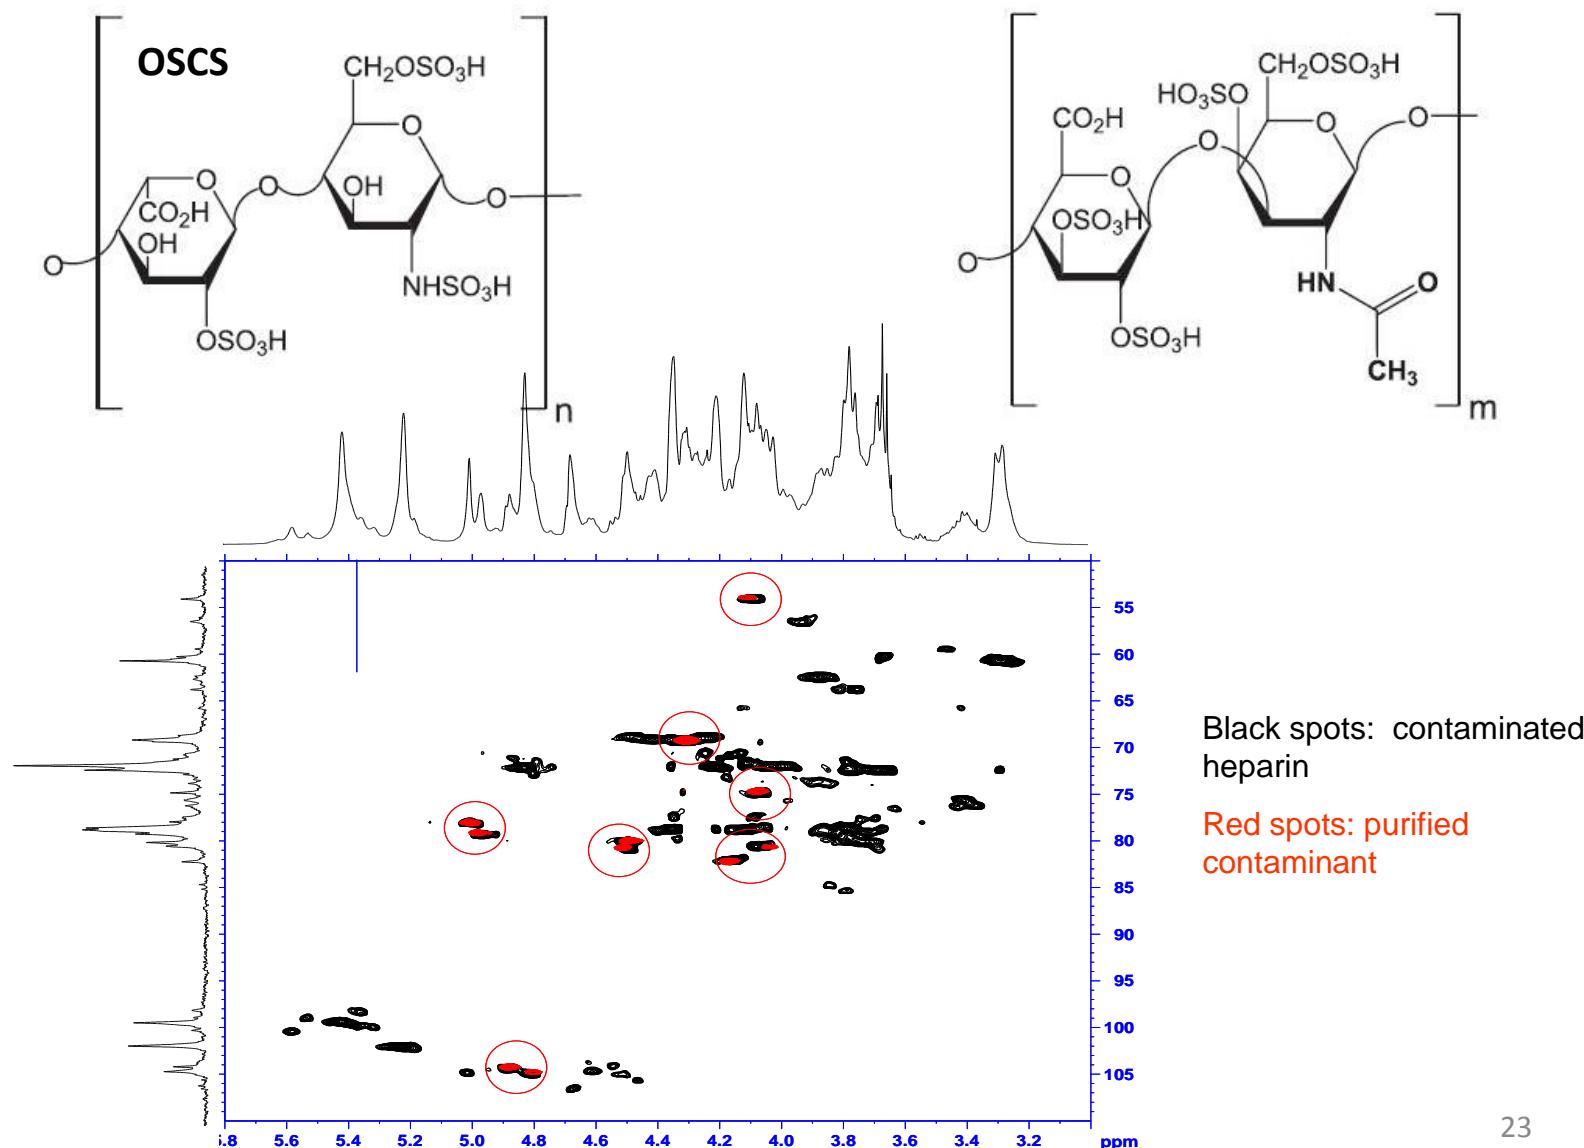

Contaminated heparin

Standard Heparin

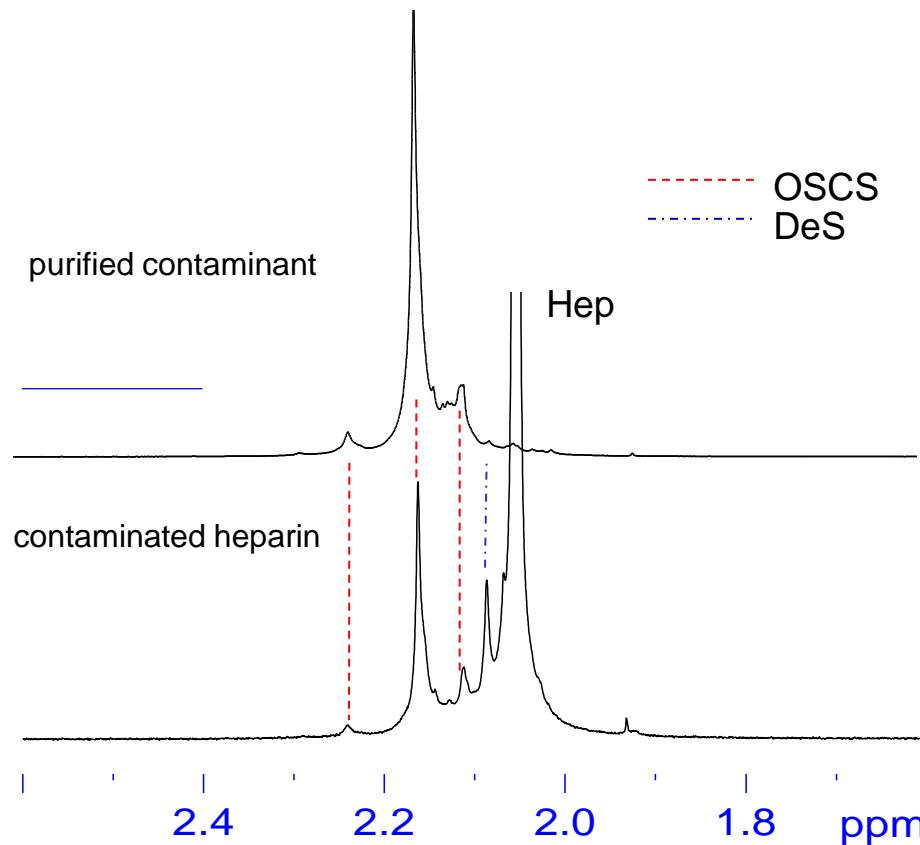

The contaminated Heparin story

The contaminated Heparin story

N-acetyl signals in the ^1H -NMR spectra of a OSCS-contaminated heparin and after heparin removal

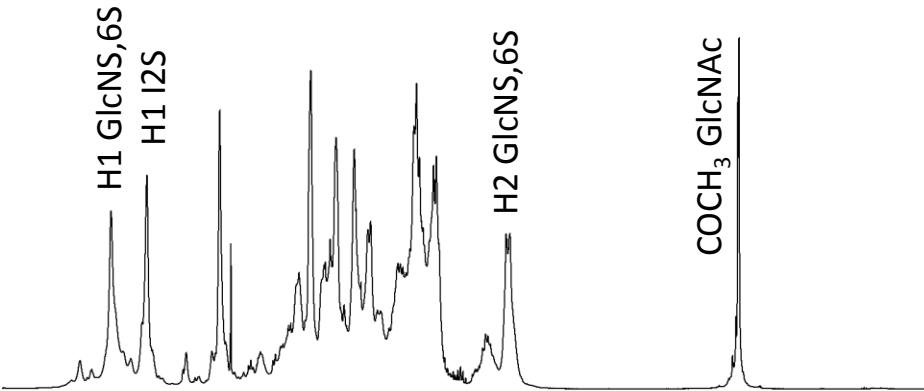

USP Heparin Sodium Specifications: pre and post “Heparin crisis”

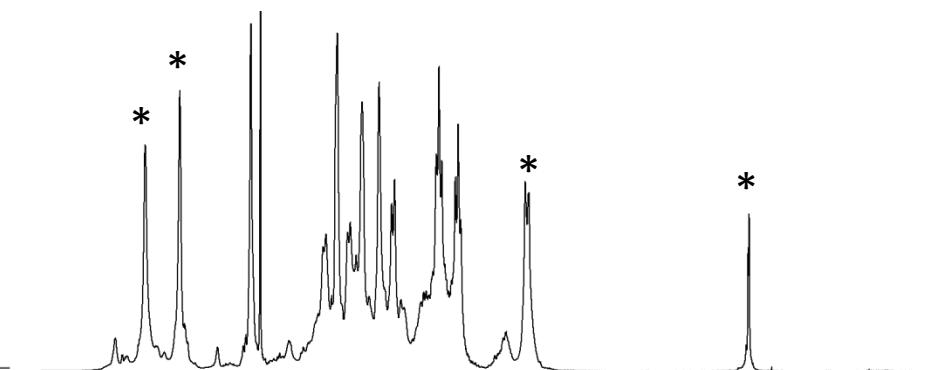

| Test | Pre-2008 | 2008-2014 |
|-----------------------------------------|---------------------------------|----------------------------------------------------|
| Identification | Sodium | + 1H NMR + HPLC + MW |
| Assay of Heparin Potency (dry basis) | NLT 140 USP U/mg (clotting) | NLT 180 USP U/mg a-IIa assay |
| Activity | 80 to 120% (aXa) | aXa/alla ratio |
| Absence of OSCS | no | Yes |
| Organic impurities | no | Galactosamine + nucleotides + residual solvents |
| Heavy Metals | Conforms | Conforms |
| Protein (TCA method) | No Turbidity Observed | Revised protein impurities |
| Bacterial Endotoxins | NMT 0.03 USP EU/USP Unit | NMT 0.01 USP EU/USP Unit |
| Loss on Drying | Not More than 5% | Not More than 5% |
| Labeling | species and tissue of origin | species and tissue of origin |

Proton spectra of heparin samples extracted from different species/organ sources

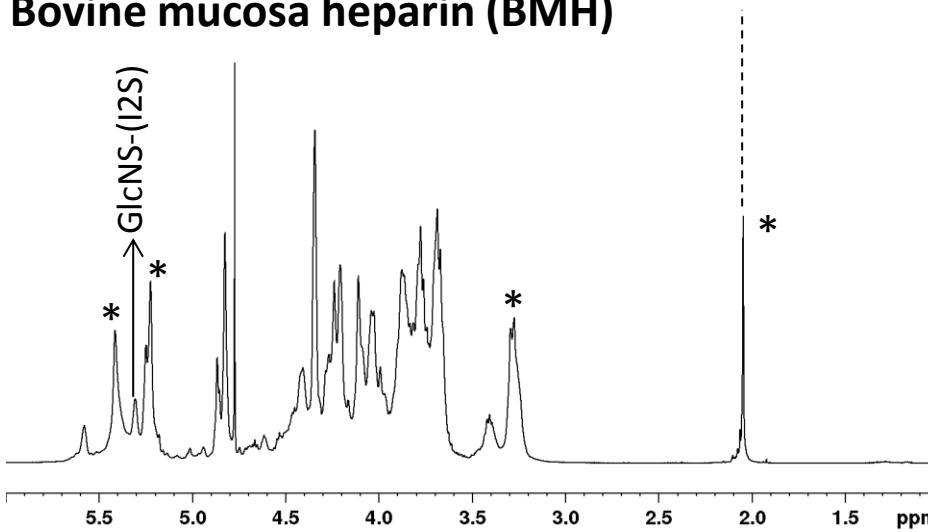

Porcine mucosa Heparin (PMH)

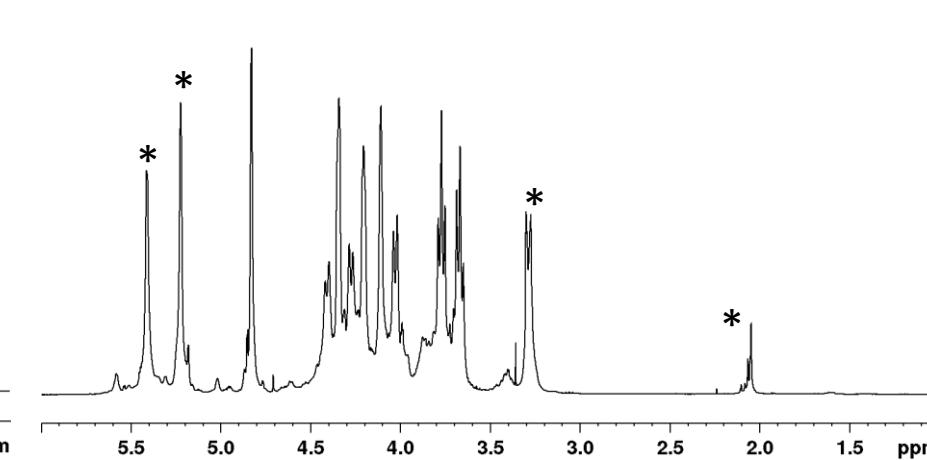

Ovine mucosa heparin (OMH)

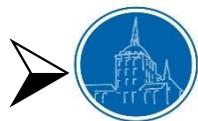

Bovine mucosa heparin (BMH)

Bovine lung heparin (BLH)
